for
Volume 79, 1960

This section contains complete multientry indexes covering the contents of *Electrical Engineering* for the calendar year 1960. It includes all special articles and authors, all news items, and all items published in *Electrical Engineering* on AIEE technical program papers, whether they appear in the form of a digest, essentially full text, or full text. The technical program papers are indexed also by both title and author.

With further reference to technical program papers, if a *Digest* appears, it will be listed as (Digest of 60-000). If the essentially full text or the full text appears, it will be listed simply as (60-000).

The contents are arranged according to **Subject** and **Author Index** listing articles and authors; **News Index** listing all items that appeared in Institute Activities and Of Current Interest sections, with a **Biographical Index** of personal and obituary items on AIEE members.
